

NORTHSIDE INTERCEPTOR TUNNEL

Noise Monitoring

What is this orange box?

It's a noise monitor. It allows the City to monitor noise during construction activities.

How long will it be here?

The noise monitors will be in place until the Northside Interceptor Tunnel project is finished in 2027.

Why do we need it?

The City's Contractor is required to monitor noise levels. If noise levels exceed the City's threshold, we work with the Contractor to reduce noise on the construction site.

Where can I get more information?

We are updating our website regularly!
